GitHub actions Workflow with docker

```
Microsoft Windows [Version 10.0.26200.8037]
(c) Microsoft Corporation. All rights reserved.

C:\Users\narut>mkdir docker-app

C:\Users\narut>cd docker-app

C:\Users\narut\docker-app>dir
 Volume in drive C is Windows
 Volume Serial Number is 2461-2C7D

 Directory of C:\Users\narut\docker-app

10-04-2026  10:52    <DIR>          .
10-04-2026  10:52    <DIR>          ..
               0 File(s)              0 bytes
               2 Dir(s)   9,403,924,480 bytes free

C:\Users\narut\docker-app>notepad app.py

C:\Users\narut\docker-app>notepad requirement.txt

C:\Users\narut\docker-app>notepad Dockerfile

C:\Users\narut\docker-app>ren Dockerfile.txt Dockerfile
```

STEP-01: mkdir my-docker-app and cd my-docker-app

STEP-02: Get inside the folder

STEP-03: Create the files named as app.py, requirement.txt, Dockerfile with the proper content

```
C:\Users\narut\docker-app>mkdir .github\workflows

C:\Users\narut\docker-app>dir
 Volume in drive C is Windows
 Volume Serial Number is 2461-2C7D

 Directory of C:\Users\narut\docker-app

10-04-2026  11:06    <DIR>          .
10-04-2026  10:52    <DIR>          ..
10-04-2026  11:10    <DIR>          .github
10-04-2026  10:53               189 app.py
10-04-2026  10:57                 0 Dockerfile
10-04-2026  10:54                 5 requirement.txt
               3 File(s)            194 bytes
               3 Dir(s)   9,401,081,856 bytes free

C:\Users\narut\docker-app>cd .github

C:\Users\narut\docker-app\.github>dir
 Volume in drive C is Windows
 Volume Serial Number is 2461-2C7D

 Directory of C:\Users\narut\docker-app\.github

10-04-2026  11:10    <DIR>          .
10-04-2026  11:06    <DIR>          ..
10-04-2026  11:10    <DIR>          workflows
               0 File(s)              0 bytes
               3 Dir(s)   9,401,438,208 bytes free
```

STEP-04: Create another directory .github/workflows

STEP-05: In that directory create a file name ci-cd.yml

```
User@Ashika MINGW64 ~ (master)
$ cd docker-app

User@Ashika MINGW64 ~/docker-app (main)
$ git add .

User@Ashika MINGW64 ~/docker-app (main)
$ git commit-m "Edited Dockerfile and workflow content"
git: 'commit-m' is not a git command. See 'git --help'.

The most similar command is
        commit-tree

User@Ashika MINGW64 ~/docker-app (main)
$ git commit -m "Edited Dockerfile and workflow content"
[main 7f0a0cd] Edited Dockerfile and workflow content
 2 files changed, 29 insertions(+)

User@Ashika MINGW64 ~/docker-app (main)
$ git push

   0c55c58..7f0a0cd  main -> main

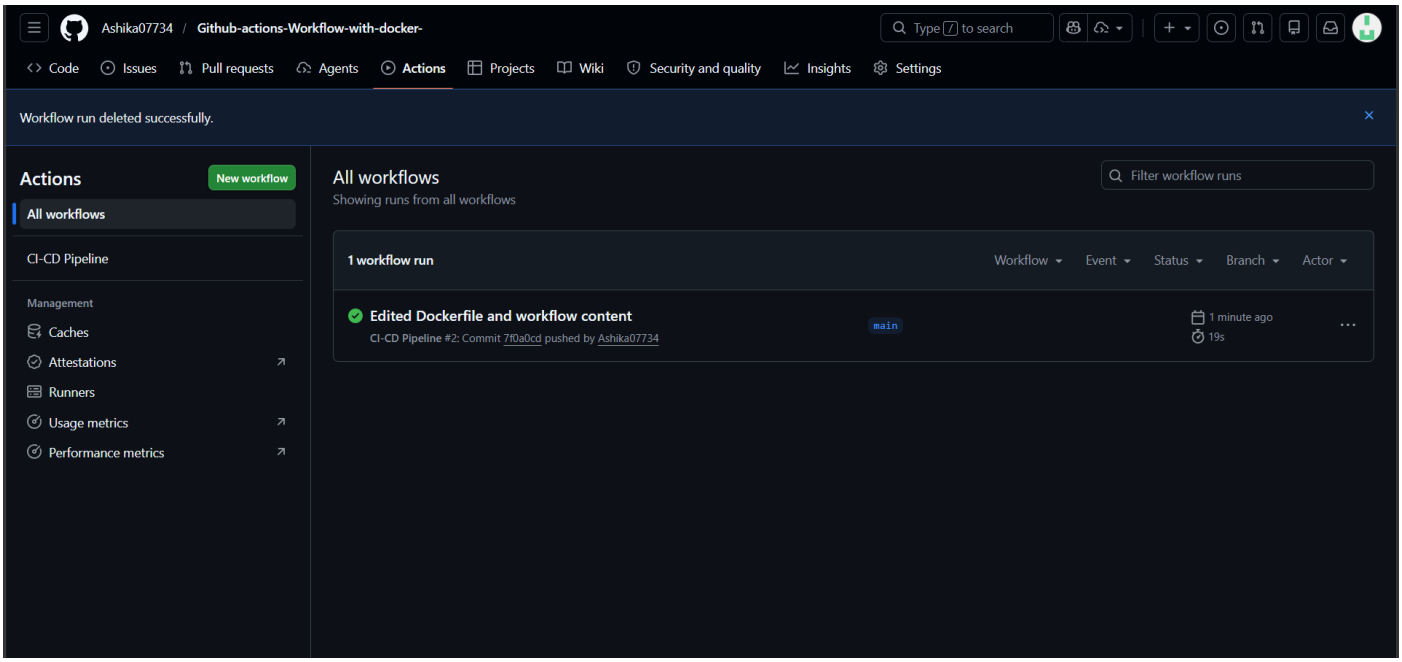
User@Ashika MINGW64 ~/docker-app (main)
$
```

Step-06: git add .

Git commit -m “ message”

Git remote origin <url of git hub repo>

Git push origin main



STEP-07: Open the repo go to the GitHub actions see the workflow is running.
